

More than 200 Experts from IT Management Will Join Together in Riga!

July 30, 2013

On September 6-7th the Latvian-based **Zabbix SIA** company is organizing its 3rd IT event – [Zabbix Conference 2013](#) that is about to gather more than 200 IT experts from around the world to share their professional knowledge and experience about one of the leading monitoring solutions on the global market – Zabbix.

Coming from Latvia, Zabbix SIA has a very close connection and doubtless attachment to its home country, thus, for the third time, it has been decided that Zabbix Conference 2013 will take place in **Riga, Latvia**.

Zabbix Conference is a yearly community event that gathers Zabbix fans, users and experts from all over the world to share their knowledge, experience and best practices about the company's flagship product – **Zabbix Monitoring Solution**.

Zabbix Conference 2013 will be held at the conference hall of Radisson Blu Daugava Hotel. During the two-day event [21 international speakers](#) will give their talks about Zabbix that will cover a wide diversity of topics about monitoring IT environments within different-sized and multi-directional companies.

Zabbix Conference is the biggest company event of the year and without doubt is one of the biggest IT conferences in Latvia. Representatives of different business sectors are coming to this grand event, including Zabbix trustful partners and clients from banking & finance, government, healthcare & medical, IT & telecommunications, energy & chemicals, aerospace, education, marketing and retail industries. [Registration](#) for the Zabbix Conference 2013 is open until August 23rd, 2013.

Encl: About Zabbix Software and Zabbix Company (1p.)

About Zabbix Software

Zabbix is an enterprise-class open source distributed monitoring solution designed to monitor and track performance and availability of network servers, devices, services and other IT resources.

Zabbix is an all-in-one monitoring solution that allows users to collect, store, manage and analyze information received from IT infrastructure, as well as display on-screen, and alert by e-mail, SMS or Jabber when thresholds are reached.

Zabbix allows administrators to recognize server and device problems in a short period of time and therefore reduces the system downtime and risk of system failure. The monitoring solution is being actively used by SMBs and large enterprises across all industries and in almost every country in the world.

About Zabbix Company

Zabbix SIA was established in 2005. It is a software development company with the headquarters situated in Riga, Latvia and a subsidiary office in Tokyo, Japan. The company's flagship product is Zabbix – an enterprise-class open source distributed monitoring solution. Zabbix SIA provides a wide range of commercial services such as technical and consultative support, Zabbix integration, implementation and customized development services as well as Zabbix professional training. The main focus is on a flexible approach to the customer needs and the ability to deliver first-class services at affordable prices. Zabbix Company has over 50 partners all around the world, among which are many local industry leaders.

Zabbix SIA has a large portfolio of customers of various sizes from different industries. Among company's clients are some of the largest telecommunications, financial, educational, retail, healthcare, and government companies around the world, some of which are on the Fortune 500 list of the year 2012.
